## ‘Null Subject Parameter’

Partial ‘null subject’ :

↗

stage n: full paradigm (French)

stage 0: no Subject clitic (Latin)

**Postulate: The diachronic change is revealed  
by diatopic variation.**

2016.10.13Heap, LingLunch, Paris72

## Null Subject

[L]anguages that split ... pro-drop systems are not abundant, but they are sufficiently common to pose a very real and interesting problem for the structural treatment of pro-drop. [...] **The place at which systems split also invites attention.** Are the restrictions on which subjects may be phonetically null predictable cross-linguistically, or are the constraints always going to be idiosyncratic to each language?

(Meyerhoff 1997: 97)

2016.10.13Heap, LingLunch, Paris73

## OCCITANIA

stage 5	P4		P1	P1
stage 6	P1		P4 and P5	P4 and P5

2016.10.13

Heap, LingLunch, Paris7

9

### Previous analyses 2

Heap 2002b

Generalisation 1:

In grammars with split subject pronoun paradigms (having from 1 to 5 persons used regularly), Block A pronouns (2sg, 3sg & 3pl) will be favoured, while block B pronouns (1pl, 1sg & 2pl) will be disfavoured.

Generalisation 2:

In a grammar which uses more than one subject pronoun (near-) categorically, the 2sg must be present.

➔ P2 : among the first SCI to appear

2016.10.13

Heap, LingLunch, Paris7

10

### Previous analyses 3

Oliviéri 2011

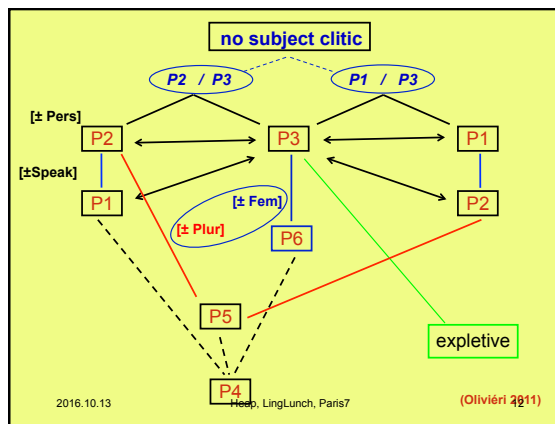

As the trigger is the necessity to distinguish different persons, what needs to be considered are not the actual markers, but rather **what is distinguished** and **how it is distinguished**. Thus, what needs to be parameterized is this distinction, not the emergence of the clitic itself: when a dialect has to distinguish P2 from P3, one or the other, or both, can be expressed first by a clitic, hence the observed diversity.

(Oliviéri 2011: 248)

2016.10.13

Heap, LingLunch, Paris7

11

2016.10.13

Heap, LingLunch, Paris7

(Oliviéri 2011)

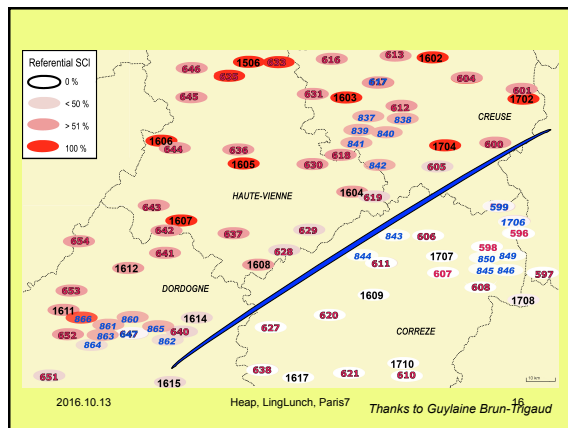

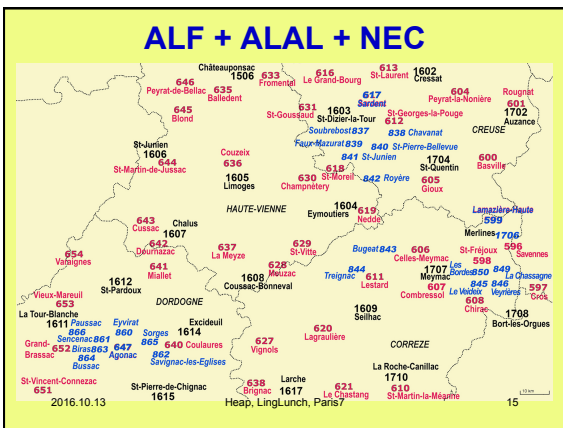

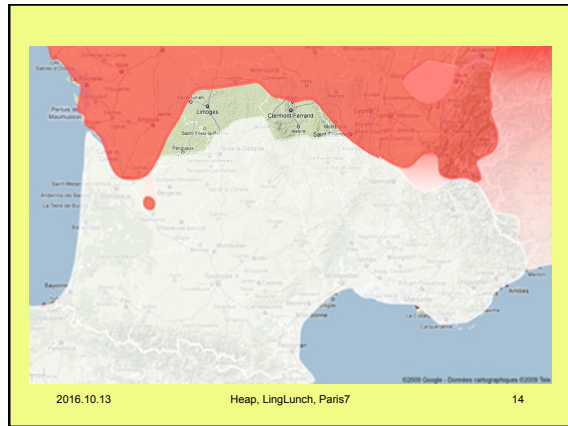

### Previous analyses 3

**Oliviéri 2011**

Some constraints exist: P4, P5, and P6 clitics never emerge first; P2 clitic is never the last SCI to appear; P5 and P6 never occur before P2 and P3. So it is *not* the case that 'everything is possible'.

(Oliviéri 2011: 248)

2016.10.13 Heap, LingLunch, Paris7 13

### ko : a different subject pronoun

*ko* emerges in the dialect of Corrèze as the **first subject pronoun** which starts to be obligatorily used. Our speculation is that it is the first element to introduce the change of this dialect from a null subject language to a non-null subject language. In other words, **it triggers the change with respect to the pro-drop status of the dialect.**

(Kaiser, Oliviéri, Palasis 2013: 19)

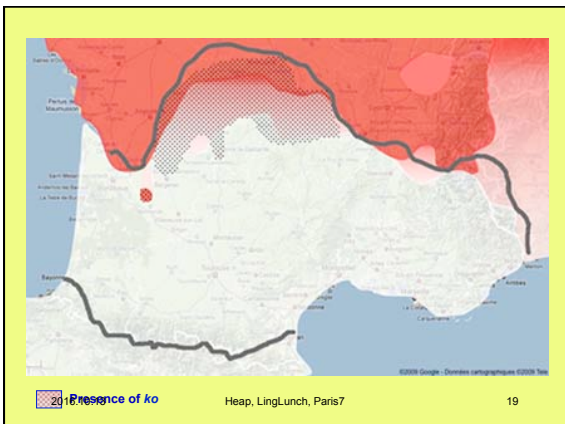

**Meteorological subjects are the first subject pronouns to appear**

2016.10.13 Heap, LingLunch, Paris7 17

Il me semble qu'elle dit que...	mo f'abla ke.	mo s'abla ke	me f'eblo ke	me f'eblo k.	i m s'eblo k.	"it seems to me that she says that..."

2016.10.13 Heap, LingLunch, Paris7 24

### Progression of ko

**stage 1** : Meteorological Verbs  
**stage 2** : Meteorological expressions  
**stage 3** : Impersonal Verbs 1 (*it is possible*)  
**stage 4** : Impersonal Verbs 2 (*it seems*)

2016.10.13 Heap, LingLunch, Paris7 25

### Referential subject clitics vs. ko in NODs

Referential Subject Clitics

ko

Corrèze	Dordogne	Creuse
33,56%	46,61%	67,36%

Corrèze > Dordogne > Creuse

2016.10.13 Heap, LingLunch, Paris7 26

### Getting beyond binary features

	[± Pers]	[± Speak]	[± Fem]	[± Plur]
Pe1	+	+	0	-
Pe2	+	-	0	-
Pe3 masc	-	0	-	-
Pe3 fem	-	0	+	-
Pe4	+	+	0	+
Pe5	+	-	0	+
Pe6 masc	-	0	-	+
Pe6 fem	-	0	+	+
Expletive	0	0	0	0

2016.10.13 Heap, LingLunch, Paris7 (Olivieri 2011) 27

### Feature geometries

Heap 2002b

Generalisation 1 and 2 reformulated

➔ underspecification

In split paradigms, subject pronouns appear first among Referring Expressions which are **not** underlyingly specified as including Participant.  
(Heap 2002: 141)

➔ P2 = the least marked (i.e. least specified) subject person

2016.10.13 Heap, LingLunch, Paris7 28

### Feature geometries

**PRONominal**

**PARTICIPANT**      **OTHER**

speaker    addressee    group    **CLASS**

feminine ...

2016.10.13 Heap, LingLunch, Paris7 (Harley & Ritter 2000, 2002) 29

### ako > ko

	Question	846 Veyrières (Corrèze)	843 Biras (Dordogne)	841 La Chassagne (Creuse)	
Subject	Ça te plaît?	ko te plɛ:	ka te plɛ:	ka te pla	"Do you like that?"
	Ça ne fait rien.	ko no faj ʁe	ko faj ʁe	ka no faj ʁe	"Never mind"
Object	Pourquoi tu fais ça?	peʁk'ɛ fa ko	peʁk'ɛ fa ko	peʁ de ke te fa ak'o	"why are you doing that?"
	Je veux ça et ça!	v'lo ko e ko	v'ole ko d'aki e ko d'aki	v'ole ko e ko	"I want that and that"
